UMAR BIN SAYEED

Lead Planning & Project Control Engineer | Contract & Risk Management | Delay Analysis & EOT Claims

Riyadh, Saudi Arabia | +966 546475093 | usayeed@motiveint.com

linkedin.com/in/umar-bin-sayeed-9090ab2aa | Member, Saudi Council of Engineers (SCE)

PROFESSIONAL SUMMARY

Lead Planning & Project Control Engineer with 8 years in construction, including nearly 4 years in Riyadh leading project controls on **fit-out, MEP and IT/ELV projects** in Kingdom Tower, KAFD, STC Square, Digital City and MISK City. Combines **construction management, contract management and risk management**: controls programmes against contractual milestones, administers delay and early-warning notices, assesses variations, and has substantiated and secured **185+ days of EOT across 5 claims** on PepsiCo HQ, PepsiCo R&D and DDC HQ. Works daily with engineering consultants and client representatives including JLL, Savills, Richmond and Echalle, and brings clear, data-driven reporting to clients and senior management.

KEY ACHIEVEMENTS

- **Secured 185+ days of EOT entitlement across 5 claims —** PepsiCo HQ (64 days, 2 claims), DDC HQ (60+ days, 2 claims) and PepsiCo R&D (61 days), protecting the company against liquidated damages.
- **Reduced delay exposure by an estimated 15%** through proactive monitoring, early-warning notices and recovery scheduling.
- **Maintained a 100% on-time record for tender and bid programmes** across every pursuit, supporting the company's bidding pipeline.
- **Introduced customised executive dashboards and KPI reporting** that improved schedule visibility and decision-making for senior management, clients and consultants.

CORE COMPETENCIES

- Construction Management & Project Controls
- Contract Management & Contractual Notices
- Delay Analysis & Extension of Time (EOT) Claims
- Variation & Change Impact Assessment
- Risk Identification, Assessment & Mitigation
- Consultant & Client Interface
- Project Planning & Scheduling (Primavera P6, MS Project)
- Critical Path Method (CPM) & Earned Value (SPI/CPI)
- Baseline, Cost- & Resource-Loaded Programmes
- Recovery & Acceleration Planning
- MEP & IT/ELV Systems Planning & Coordination
- Progress Reporting, KPIs & Executive Dashboards

Systems: HVAC, Electrical, Plumbing, Firefighting, ELV (BMS, CCTV, Access Control, Structured Cabling, Data Networks), plus civil, architectural and interior fit-out interfaces.
Tools: Primavera P6, MS Project, MS Excel (advanced trackers & dashboards), MS Office.

PROFESSIONAL EXPERIENCE

Lead Planning & Project Control Engineer — Jan 2024 – Present

Motive International Contracting Co. — Riyadh, Saudi Arabia

Design-and-build contractor delivering fit-out and MEP works. Lead the planning and controls function across up to 4 concurrent projects.

- Build and maintain approved Primavera P6 baselines integrating scope, WBS, productivity rates, procurement and contractual milestones; prepare cost- and resource-loaded programmes for manpower planning and cash-flow forecasting.
- Run CPM analysis against baseline to identify variances, forecast completion, and develop recovery and acceleration plans that bring projects back to contractual dates.
- Prepare EOT claims end to end: delay-event identification, critical-path impact assessment, contemporaneous record review and persuasive narratives, issued with timely delay and early-warning notices to preserve entitlement.
- Contract management: assess the time and cost impact of variations, design changes, late approvals and procurement delays against contract terms, and advise management on entitlement and mitigation.
- Risk management: identify schedule and delivery risks through look-ahead and critical-path reviews, flag them early to management and consultants, and implement mitigation measures.
- Act as the planning interface with engineering consultants and client representatives (JLL, Savills, Richmond, Echalle) on programme submissions, progress reviews and delay notices.
- Developed the project control system: procurement trackers, material submittal logs, shop-drawing trackers, cost comparison matrices and progress dashboards.
- Produce weekly and monthly progress reports and KPI dashboards (SPI, CPI) for clients, consultants and senior management, highlighting risks and mitigation.

- Prepare tender programmes and technical proposal content for new bids, coordinating with estimation and commercial teams.

Planning Engineer **Jan 2023 – Dec 2023**

Al-Fouzan Trading & General Contracting Co. — Riyadh, Saudi Arabia

- Prepared baseline and recovery schedules and issued daily, weekly and monthly progress and delay reports.
- Calculated material, multi-trade manpower and machinery requirements to support site execution.
- Tracked company- and subcontractor-caused delays and reported their impact on completion dates to senior management.
- Coordinated engineering, procurement and construction teams and resolved site issues through weekly project review meetings.

Planning Engineer **Apr 2021 – Dec 2022**

Lakshmi Builders & Developers — Bangalore, India

- Developed project plans and milestone schedules to secure on-time completion.
- Monitored KPIs including weekly work-order closures and progress trends, and implemented process improvements following stakeholder reviews.

Planning Engineer **Jan 2019 – Dec 2020**

BCES — Hyderabad, India

- Prepared baseline schedules, cost analyses and resource quantities.
- Tracked critical activities to avoid liquidated damages; produced S-curves, manpower histograms and look-ahead schedules.

SELECTED PROJECTS — RIYADH

10+ high-profile fit-out and MEP projects across Kingdom Tower, KAFD, STC Square, Digital City and MISK City, including:

- **PepsiCo HQ** — Consultants: Echalle & PepsiCo | MEP Fit-Out | EOT secured: 64 days
- **PepsiCo R&D** — Consultants: Echalle & PepsiCo | MEP Fit-Out | EOT secured: 61 days
- **DDC HQ** — Consultants: DDC & JLL | EOT secured: 60+ days
- **Pinsent Masons Office** — Consultants: Savills & Pinsent Masons | MEP Fit-Out
- **Café Boulud** — Consultant: Richmond | MEP Fit-Out
- **Luqma @ Kingdom Tower** — Consultant: Richmond | MEP Fit-Out

EDUCATION & CERTIFICATIONS

- **Bachelor of Engineering, Civil Engineering** — Jawaharlal Nehru Technological University (JNTU), Hyderabad, India
- Primavera P6 & MS Project — Project Planning & Scheduling
- Member, Saudi Council of Engineers (SCE)
